#### **⚠ WARNING**

Do not exceed GVWR or GAWR, including blade and ballast.

#### **⚠ CAUTION**

Use standard methods and practices when attaching snowplow and installing accessories, including proper personal protective safety equipment.

#### **⚠ CAUTION**

Read this document before installing the rubber deflector kit.

#### **⚠ CAUTION**

See your WESTERN® outlet/website for specific vehicle application recommendations before installation. The Quick Match selection system has specific vehicle and snowplow requirements.

# RUBBER DEFLECTOR KIT

## INSTALLATION INSTRUCTIONS

1. Park the vehicle on a smooth, level, hard surface, such as concrete. Lower the blade to the ground, and turn the control OFF. Disconnect the snowplow from the vehicle, or turn the vehicle ignition to the "OFF" position and remove the key.
2. Align the deflector on the blade, matching up the holes in the deflector with the holes in the moldboard.
3. Place the center retainer bar on top of the deflector, matching up the four holes in the hold-down with the four holes on the deflector. Install the center retainer using one 5/16" x 1-1/4" cap screw, one washer and one locknut for each hole, as shown. Torque fasteners to 17 ft-lb.

4. Repeat Steps 2 and 3 to install the outside retainer bars.
