**⚠ CAUTION**  
 Read this document before installing the Blade Guide Assembly.

**⚠ CAUTION**  
 Use standard methods and practices when attaching snowplow and installing accessories including proper personal protective safety equipment.

# 59700/62265/62590/62595 BLADE GUIDE ASSEMBLY

## INSTALLATION INSTRUCTIONS

1. Park the vehicle on a smooth, level, hard surface, such as concrete. Lower the blade to the ground, and turn the control to the OFF position. Disconnect the snowplow from the vehicle, or turn the vehicle ignition to the OFF position and remove the key.
2. If the hole is not pre-drilled, drill one 11/32" hole, 1" down and 1" out on the outside rib of the blade.
4. If the hole is not pre-drilled, use the lower hole of the guide/clamp as a guide, and drill an 11/32" hole.
5. Insert a 5/16" x 1" cap screw through the bottom hole and secure with a locknut. Torque both fasteners to 18 ft-lb.
6. Repeat Steps 2–5 for the opposite side.

\* Included with 59700 kit only

3. Secure the assembly using a 5/16" x 1" cap screw and locknut. Tighten until the guide will stand alone perpendicular to the road surface.

**For 59700-24": Insert the pointed end of the clamp into the coil of the guide. Attach the guide to the rib using the top hole of the clamp.**
