MVPP	MVP PLUS™ Snowplow		

⚠ WARNING

New untitled vehicle installation of a snowplow requires National Highway Traffic Safety Administration altered vehicle certification labeling. Installer to verify that selected snowplow and ballast, if required, do not exceed GVWR or GAWR rating label and complies with FMVSS.

⚠ WARNING

Do not exceed GVWR or GAWR, including blade and ballast. The rating label is found on the driver-side vehicle door cornerpost.

ABOUT THE SELECTION LIST

The *Selection List (SL)* is designed to help you determine the appropriate snowplow components for a particular snowplow vehicle application. The information published in this guide is based on Federal Motor Vehicle Safety Standards (FMVSS) and a "representative" snowplow vehicle as defined in this guide. The vehicle includes a combined weight of 300 lb for occupants in the front seat location.

This *SL* is for specific model year vehicles only and is listed on the front cover of this guide. This guide should be saved for future reference. New selection guides will be published for the upcoming model year and so on. The instructions on page 4 explain how to use the *Selection List*.

The "Representative Vehicle"

Knowing that today's snowplow vehicles come in a variety of sizes and configurations (such as wheel base, engine size, and handling packages), Western Products has defined a "representative vehicle" that contains the options most likely to appear on a typical snowplow application. The "representative vehicle" includes the following options:

- 4X4 Drivetrain (unless noted)
- Spare Tire & Wheel
- Automatic Transmission
- Rear Bumper
- Air Conditioning
- Full Fluids

NOTE: If the vehicle in question does not match a vehicle listing in the *Selection List*, or has options that differ from the "Representative Vehicle" as defined earlier, the ballast inquiry sheet must be filled out and submitted in order to determine plow availability and correct ballast amounts to maintain FMVSS compliance. Completed vehicle at no time shall exceed GVWR or GAWR.

Snowplow Product

Snowplows are considered motor vehicle equipment. The installer is ultimately responsible for determining and correctly labeling the vehicle with the addition of snowplow selection. No product selected and installed shall render inoperative the vehicle's safety compliance.

Product Changes

All information is as accurate as we can determine but is subject to revision with additional or more complete information. Western Products reserves the right under its product improvement policy to change construction or design details and furnish equipment when so altered without reference to illustrations or specifications used. Western Products or the vehicle manufacturer may require or recommend optional equipment for snow removal.

Ballast

When ballast is required it must be secured behind the rear wheels in a manner which prevents it from sliding during normal driving. Ballast shall not exceed 1000 lb.

Western Products offers an optional ballast retainer kit (62849) for this purpose.

HOW TO USE THE SELECTION LIST

Selection Example:

Acme Motors 15000 VX with UltraMount® System

- Go to the section for the appropriate manufacturer.
- Go to the subsection for the desired snowplow:
 - **Section 1:** Suburbanite™ & MIDWEIGHT™ snowplows
 - **Section 2:** PRO-PLOW®, PRO PLUS® & Heavy Weight snowplows
 - **Section 3:** MVP® & MVP PLUS™ snowplows
- Starting at the left-most column, find the **model** and appropriate configuration for the vehicle. In this case, 4X4, Regular Cab, 6.5 ft. box, 5.3L V8 engine, 3925 Min. FGAWR.

- Locate the **harness kit** part number for this vehicle: 27780. See Headlamp Reference Guide in the back of the Selection List for more information.
- Locate the **mount** for this vehicle: 1523 for Suburbanite™ system or 67960-1 for UltraMount® system. Refer to any footnotes concerning conditions or requirements. For this example the UltraMount system is selected and has five footnotes: 1, 2, 3, 4 and 6.
- Locate the acceptable **blades** at the top of the table. Only those blades with ballast weights listed are valid applications. Three short dashes (—) indicates an invalid application. A question mark (?) indicates a ballast inquiry sheet must be completed.

- For this example, there are two acceptable UltraMount blades. Choose the 7'-6" Steel MIDWEIGHT blade. This blade requires 350 lb of ballast.
- To order components for a complete snowplow package, read down from the top of the selected blade column for appropriate part numbers. Be sure to select *one* control, either joystick or hand-held. For this example, the part numbers would be:
 - 64340 (blade assembly)
 - 64336 (A, Q & L assembly Box 1)
 - 67992 (A, Q & L assembly Box 2)
 - 64620 (hydraulic kit)
 - 28800 (light kit)
 - 56369 or 56462 (control)
 - 27780 (harness kit, from Step 4)
 - 67960-1 (mount, from Step 5 – *must match blade*)

- Notes:**
- Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.
 - Recommended snowplow prep package whenever available.
 - Requires bumper notching.

- Recommended Z85 suspension.
- All New Style Only (2nd # in model # is 5 not 0) example: K15903. Refer to label in glove box for model number.
- These Snowplows Are For Personal/Homeowner Use Only.

- Notes:**
1. Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.
 2. Recommended snowplow prep package whenever available.
 7. "EARLY" indicates a build date before 12-01-2003, "LATE" indicates a build date on or after 12-01-2003.

- Notes:**
- Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.
 - Recommended snowplow prep package whenever available.
 - "EARLY" indicates a build date before 12-01-2003, "LATE" indicates a build date on or after 12-01-2003.

Notes:
 1. Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.

2. Recommended snowplow prep package whenever available.
 7. "EARLY" indicates a build date before 12-01-2003, "LATE" indicates a build date on or after 12-01-2003.

- Notes:**
1. Ballast amounts are based on a "Representative Vehicle," defined in the vehicle selection guide instructions, and must be modified for all other configurations for axle and GVWR compliance.
 2. Recommended snowplow prep package whenever available.
 7. "EARLY" indicates a build date before 12-01-2003, "LATE" indicates a build date on or after 12-01-2003.

* This part number is currently not available for purchase, thus finalized weights have not been established. Once weights are established and product is available, finalized weights will be published.

NOTE: The addition of accessories to a snowplow or vehicle will require additional ballast above any amount published in this guide in order to maintain FMVSS compliance. Completed vehicle with additional accessories shall not exceed GVWR or GAWR.

NOTE: An abbreviation key is on page 2.

NOTE: See next page for variable definitions.

DIMENSIONAL DIAGRAM

Variables:

X = Distance from center of front axle to receiver pin

Y = Distance from receiver pin to CG of mount.

Z = Distance from receiver pin to CG of snowplow.

Example: Weight that one would use if they had an IUTP75 with the poly deflector and a 1/2" cutting edge.

The weight of the plow alone with no accessories would be 682 lb with its center of gravity 20.8 in from the coupling point. To add the weight of the accessories, look in the row with the IUTP75 blade to find the effective poly deflector weight of 19.2 lb and the effective cutting edge weight of 25.8 lb.

The total weight of the blade and accessories will be:

$$\begin{array}{r}
 682.0 \\
 19.2 \\
 + 25.8 \\
 \hline
 727.0
 \end{array}$$

with its center of gravity still at 20.8 in from the coupling point

ALWAYS comply with the vehicle manufacturer's stated gross vehicle and axle weight ratings (found on

the driver-side door jamb of the vehicle) and front and rear weight distribution ratio with the snowplow installed. In some cases, rear ballast may be required to achieve these requirements.

Available vehicle capacities for aftermarket equipment and components can be determined by using the above information along with information provided by the vehicle manufacturer's Body Builder Guides. Follow all requirements and recommendations as stated by vehicle manufacturer.

NOTE: An abbreviation key is on page 2.

See the WESTERN[®] Selection List for additional product information.

UltraMount® SYSTEM TO UniMount® SYSTEM CONVERSION KIT (PN 27170)

⚠ WARNING

Conversion kit use is limited to vehicles up to 19,500 lb GVWR.

⚠ WARNING

Do not exceed GVWR or GAWR, including blade and ballast. The rating label is found on the driver-side vehicle door cornerpost.

This easy to use UltraMount system to UniMount system conversion kit enables you to attach a UniMount plow to a vehicle equipped with an UltraMount mount.

Simply remove the receivers from your UltraMount system mount, and pin the conversion plate in place. This accessory is perfect for customers with multiple snowplows, providing their fleet with versatility while changing to the UltraMount system.

This new kit is also ideal for transferring an old UniMount plow to a new truck. As new trucks are released, we will develop only new UltraMount mounts for these plow applications. This will allow the customer to transfer an existing UniMount plow to the late model vehicle. In addition, when customers are ready to replace their old UniMount plow, the truck will already have the mount and wiring for an UltraMount plow.

TO QUALIFY THE VEHICLE AND DETERMINE BALLAST, YOU MUST FILL OUT THE VEHICLE AND PLOW APPLICATION INQUIRY SHEET.

NOTE: When ballast is required, it should be secured behind the rear wheels in a manner which prevents it from sliding during normal driving. Western Products offers an options ballast retainer kit (PN 62849) for this purpose.
